

Benefits and Challenges of NDNQI Data Usage: An Exploratory Study by the Oklahoma NDNQI Collaborative

Karen Tomajan MS, RN, NEA-BC; Barbara J. Holtzclaw PhD, RN, FAAN; Susie Jones PhD(c), RN, APN CCNS-P

Survey Respondents

Oklahoma NDNQI Collaborative – NDNQI facilities within Oklahoma

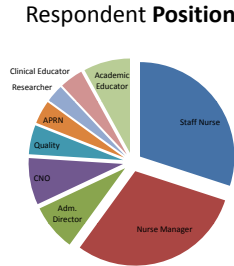

Sponsored by the Oklahoma Nurses Association (ONA)

Collaborative Goals

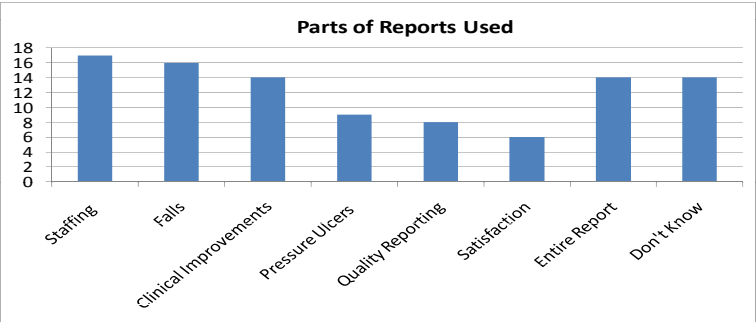

- Promote positive outcomes through NDNQI data usage
- Identify and promote best practices
- Develop framework for collaboration among facilities
- Translate NDNQI findings to bedside staff
- Promote bedside staff involvement in improvement
- Promote value of membership in ONA and ANA
- Identify policy, regulatory or educational implications for future action

Methodology

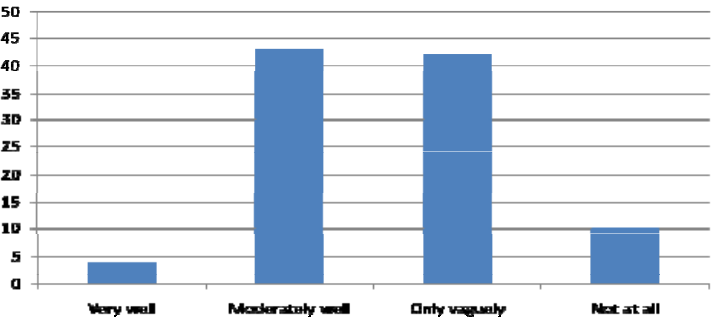

- 15 Question Survey
- Posted on ONA Website
- 115 Respondents

Report Usage

How well are reports Understood?

Challenges and Benefits

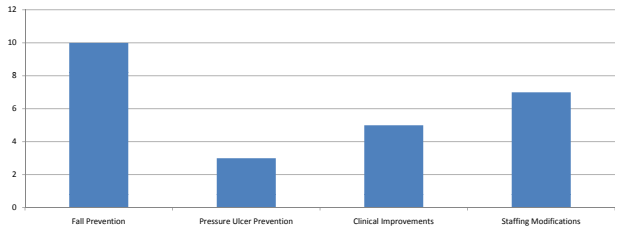

Challenges Interpreting Reports

- Too much data
- Understanding data and acronyms
- Understanding percentiles vs. percentages
- Data is old when received

Challenges in Reporting Data

- Need to summarize/format for multiple audiences (staff nurse, managers, executives)
- Ease of Understanding
- So much information

Improvements Based on NDNQI Data
