

The Power of Peer Review: Impacting Practice at the Bedside

Nicole Jarrell, MSN, RN

Pamela Baio, BSN, RN, CCRN

LeeAnna Spiva, PhD, RN, PLNC

we believe
in life well-lived.

WellStar Health System

- **Not-For Profit-Five Hospital System = 1321 Beds**
 - 180-bed Nursing Home
 - 6 Urgent Care Centers
 - 14 Imaging Centers
 - Residential Hospice
 - Assisted Living
 - Home Care
- **WellStar Kennestone Hospital Level II Trauma Center**
- **400 + Multispecialty Physicians Group (1.2 Million Office Visits/year)**
- **62,000 + Admissions/year**
- **10,000 + Deliveries/year**
- **989 Non-Employed Medical Staff**
- **12,298 Employees**
- **Revenues > \$1 Billion**

Objectives

- To describe the components of implementing the nursing peer review process in a hospital setting
- Identify opportunities for nursing practice changes and improved patient outcomes through the nursing peer review process

Nursing Peer Review Definition

Nursing peer review is an evaluation of professional nursing practice, including identification of opportunities to improve care, by individuals with the appropriate subject matter expertise to perform this evaluation.

(Harrington & Smith, 2008)

Historical Perspective

System level review of cases referred

- CNS review of case
- If formal team review held, it would be from an uninvolved “like” unit from a different facility
- Only 2-3 cases per year referred
- Demonstrated dissatisfaction with process

Shared governance raised concerns

- What’s best practice for peer review?
- How can we encourage ownership of nurses for their own practice?
- Thus a system wide task force was established to research and revamp our process

Staff Empowerment

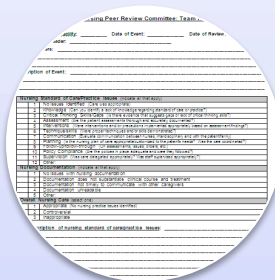

- Nursing Peer Review (NPR) engages the bedside nurse to be empowered to make nursing practice changes based on the peer review findings
- In order to increase participation and ownership at the unit level, it was necessary to develop a consistent nursing peer review structure and process

Research and Development

Literature Review

- Very little in the literature about nursing peer review

Program Development

- Identified Committee Membership
- Outlined the Review Process
- Developed the Tools
- Developed policy for NPR
- Developed NPR model

Program Implementation & Evaluation

- Implemented in all 5 facilities
- Structure varies based on size of facility and resources
- Data collection on outcomes from cases

Nursing Peer Review Model

Conducting case reviews

NURSING PEER REVIEW COMMITTEE (NPRC)

Purpose of NPRC

- Nursing Peer Review Committee (NPRC) in a **non-punitive** manner, identify and communicate
 - Nursing-related patient care concerns using a standardized process
 - Process for identifying issues deserving intense analysis
 - Educational opportunities

Goals of Nursing Peer Review

Identify opportunities for improvements in practice

Identify barriers impacting patient care

Enhance nursing performance

Improve outcomes

Committee (NPRC) Structure

Shared Governance

- NPRC was integrated into the hospital and system Shared Governance Structure
- Process includes sharing lessons learned in shared governance meetings

Team Structure

- Membership is based on similar practice areas
- Participating staff are selected by their nurse manager
- Serve a 1-2 year term rolling-off incrementally to avoid having 100% turnover

Team Leadership

- Collaboratively led by staff nurse with an APN, educator or other nursing leader
- Ad hoc advisors are consulted by the committee as deemed appropriate

Team Meetings

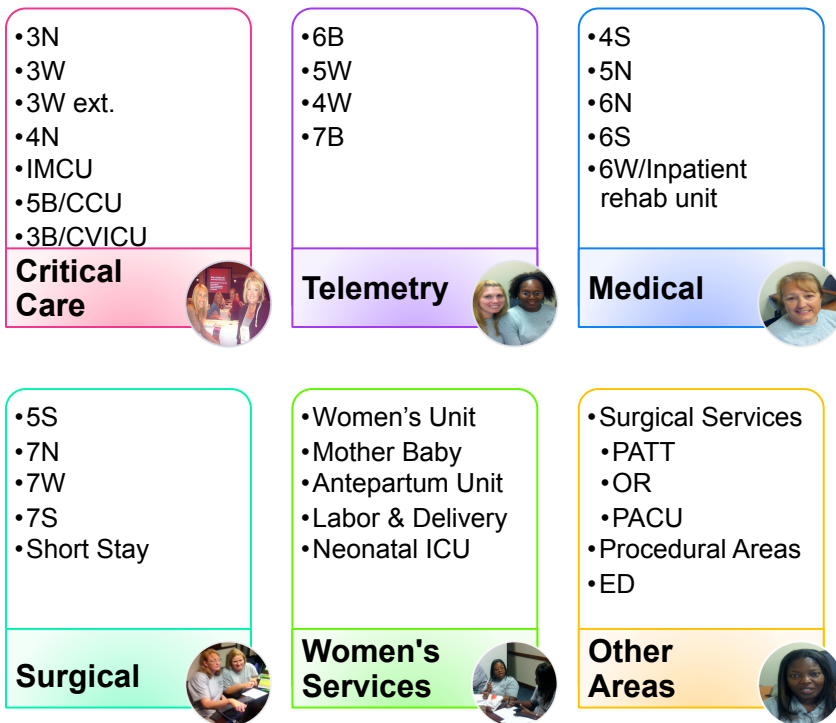

- Scheduled monthly NPRC meetings
- Attendance includes identified staff nurse representatives (peers/team) and staff involved in the incident/care of the patient

Manager Responsibility

- Ensures staff participation in review
- Implementation of action plan
- Any follow-up monitoring required
- Disciplinary action is taken prior to peer review

Kennestone Hospital's (633 beds) NPRC Team Structure

Teams

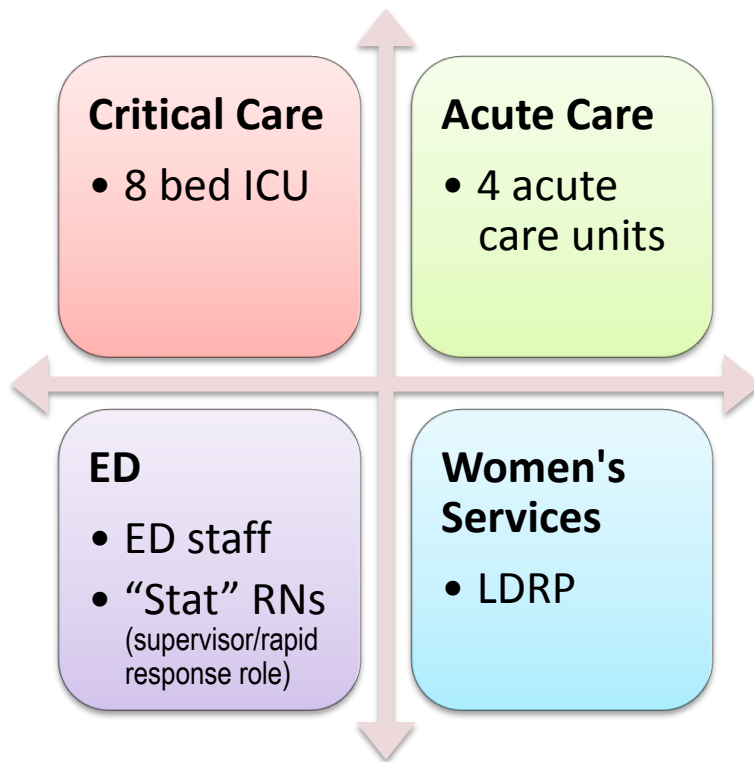

Facilitation

- Collaboratively led by staff RNs and APNs for the specialty areas
- Regular monthly meetings scheduled
 - Cancelled if no case to review
 - Appropriate team is assembled for each case

Douglas Hospital's (108 beds) NPRC Team Structure

Teams

Facilitation

- Led by the unit based educators
- Cases often cross between specialty areas so teams are combined as needed based on what areas are impacted
- "Stat" RNs participation is key as they respond to rapid response calls and travel throughout the hospital

Windy Hill Hospital's (55 beds) NPRC Team Structure

Team

Facilitation

- Led by the facility's PI/ Accreditation Coordinator (MSN)
- Only 2 practice areas are at WHH, thus they have 1 team with both areas represented
- Promotes teamwork between departments

Process and tools are consistent across the organization

CASE REVIEW PROCESS AND TOOLS

Nursing Peer Review Process

WELLSTAR

NURSING PEER REVIEW COMMITTEE (NPRC) REFERRAL

MR#: _____

Date(s) of Concern: _____ Referral Date: _____

Referring Person: _____ Department: _____

Contact Information (phone and/or e-mail): _____
(This referral will remain confidential during committee review. However, contact information is needed for NPRC chair to confirm receipt/investigation of referral and in the event additional information is requested by Committee.)

| | | |
|---------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Situation <small>Why is the case being reviewed?</small> | <small>What is the main focus for this review?</small> | |
| Background <small>What happened?</small> | <small>What are details of the event? When did it occur?</small> | |
| | <small>What area(s) and/or service(s) were involved?</small> | |
| Assessment <small>To the best of your knowledge, why did it happen?</small> | <small>Were there issues with equipment, communication, missing information, policies/procedures, processes and/or other human factors?</small> | |
| Request <small>What specifically would you like for the peer review team to evaluate?</small> | | |

Please submit completed form electronically or via fax to the NPRC Chair at your facility as indicated on eSource under the Center for Nursing Excellence webpage (See Peer Review)

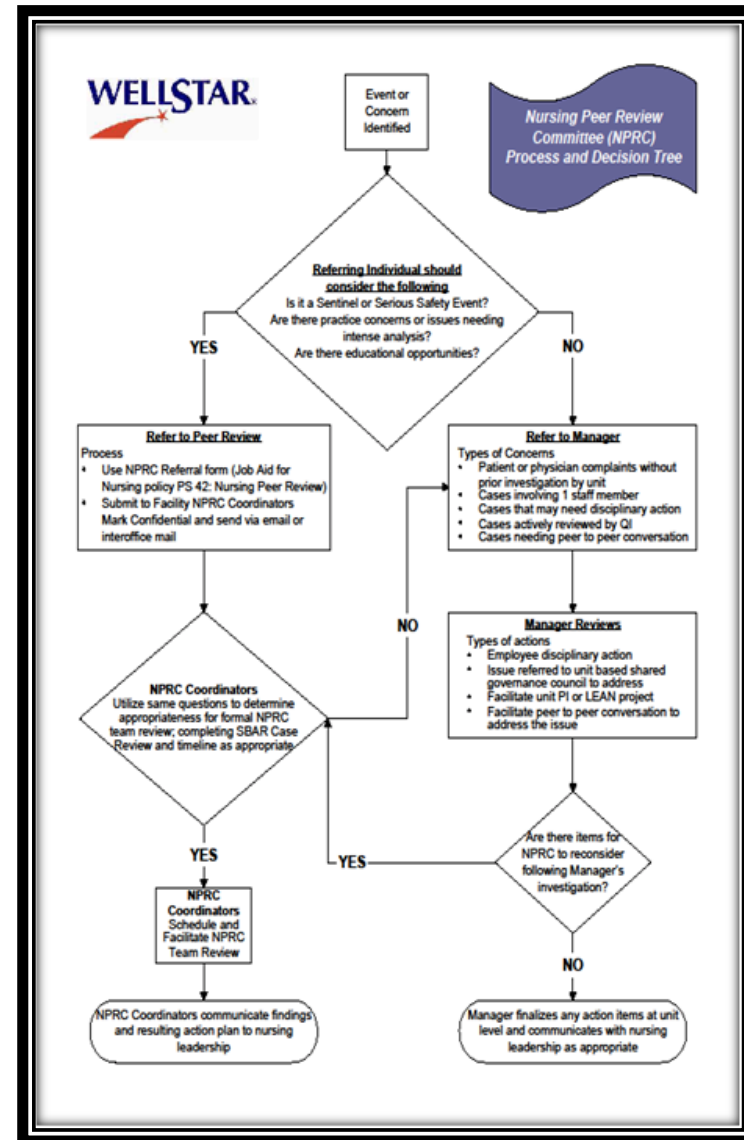

You will be contacted by NPRC Chair to confirm receipt/investigation of referral. Outcome of investigation is protected by Georgia Law and will not be shared.

CONFIDENTIAL: Peer review protected pursuant to GA Law. This document is not a part of the patient's permanent record and should be submitted to nursing leadership.

- Referrals may be communicated to facility NPRC Coordinator by submitting referral form via email or hard copy to NPRC
- Case referral process- multiple avenues
 - Incident reporting through risk management
 - Medical Staff
 - Anonymous
 - Staff
 - Nurse Leaders
 - Patients & Families

Nursing Peer Review Process & Decision Tree

- Step-by-step process
- Defines the process for peer review to ensure consistency
- Provides framework to screen for appropriateness of case review

Nursing Peer Review Process

WELLSTAR Nursing Peer Review Committee Case Review (SBAR)

Unit(s): _____ Facility: _____ Date of Event: _____
 Reviewer(s): _____ Date Review Completed: _____
 Staff Involved in the Incident: _____

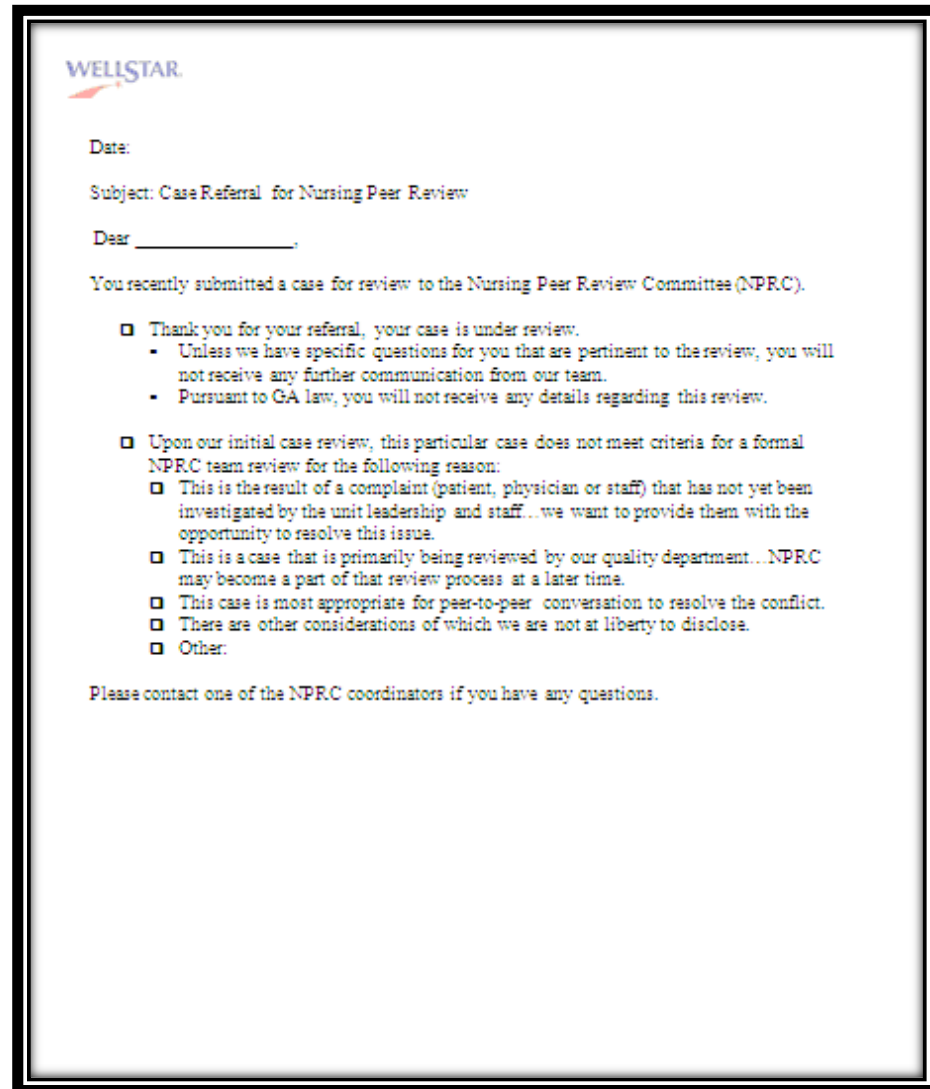

| SBAR Analysis | | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|--|
| Situation Why is this case being reviewed? | What is the main focus for this review? | |
| Background What happened? | What are the details of the event? When did it occur? (attach and refer to timeline as appropriate for details) | |
| | What area(s) and/or service(s) were involved? | |
| Assessment Why did it happen? Amendatory questions applicable for this case | What equipment was involved in the incident? | |
| | What are the steps in the process? | |
| | What human factors were relevant to the outcome? | |
| | Was there a barrier related to our communication processes? | |
| | Was all the information available when needed? | |
| | Was staff currently competent for their responsibilities? | |
| | Was staffing adequate? | |
| Was there sufficient leadership support for the staff when the incident occurred? | | |
| What current policies or procedures are relevant to the case? Did the staff follow the policy/procedure? Is the policy or procedure up to date with best practice standards? | | |

CONFIDENTIAL: Peer Review Initiated Pursuant to GR Law
 This document is not a part of the patient's permanent record and should be submitted to nursing leadership

- Initial Review
- Use Case Review Form
 - SBAR format used to assist staff with the initial review of the referred case includes
 - Alteration in the nursing process,
 - What caused the alteration?
 - Adequacy of documentation
 - Contributing factors
 - Determination if the alteration caused harm to the patient
 - Recommendations

Acknowledgement Letter

- Sent to referring individual to acknowledge the case referral to nursing peer review
- When the case isn't appropriate, it provides feedback as to why and helps to decrease inappropriate referrals

Team Review

- Committee Review Process
- Leader presents case for team discussion using review form
- Identifies issues with
 - Standards of care
 - Knowledge deficit
 - Critical thinking
 - Communication
 - Policy compliance
 - Documentation
 - Overall nursing care
- Also documents follow-up, unit action plan & exemplary nominations

WELLSTAR **Nursing Peer Review Committee: Team Review**

Unit: _____ Facility: _____ Date of Event: _____ Date of Review: _____

Review Team Leader: _____

Team Members: _____

Description of Event: _____

| Nursing Standard of Care/Practice Issues (indicate all that apply) | |
|--------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------|
| <input type="checkbox"/> | 1. No issues identified (Care was appropriate) |
| <input type="checkbox"/> | 2. Knowledge (Can you identify a lack of knowledge regarding standard of care or practice?) |
| <input type="checkbox"/> | 3. Critical Thinking - Skills/GAPS (Is there evidence that suggests gaps or lack of critical thinking skills?) |
| <input type="checkbox"/> | 4. Assessment (Are the patient assessments thorough and accurately documented?) |
| <input type="checkbox"/> | 5. Interventions (Were interventions and/or precautions implemented appropriately based on assessment findings?) |
| <input type="checkbox"/> | 6. Technique/Skills (Were proper techniques and/or skills demonstrated?) |
| <input type="checkbox"/> | 7. Communication (Evaluate communication between nurses, interdisciplinary and with the patient/family) |
| <input type="checkbox"/> | 8. Planning (Is the nursing plan of care appropriate customized to the patient's needs? Was the care coordinated?) |
| <input type="checkbox"/> | 9. Follow-up/follow-through (On assessments, issues, orders, etc.) |
| <input type="checkbox"/> | 10. Policy Compliance (Are the policies in place adequate and were they followed?) |
| <input type="checkbox"/> | 11. Supervision (Was care delegated appropriately? Was staff supervised appropriately?) |
| <input type="checkbox"/> | 12. Other |
| Nursing Documentation (indicate all that apply) | |
| <input type="checkbox"/> | 1. No issues with nursing documentation |
| <input type="checkbox"/> | 2. Documentation does not substantiate clinical course and treatment |
| <input type="checkbox"/> | 3. Documentation not timely to communicate with other caregivers |
| <input type="checkbox"/> | 4. Documentation unreadable |
| <input type="checkbox"/> | 5. Other |
| Overall Nursing Care (select one) | |
| <input type="checkbox"/> | 1. Appropriate (No nursing practice issues identified) |
| <input type="checkbox"/> | 2. Controversial |
| <input type="checkbox"/> | 3. Inappropriate |

Nursing Peer Review Communication

WELLSTAR Nursing Peer Review: Lessons Learned

CONFIDENTIAL: ensure all information is de-identified (NO Patient or Staff names are to be mentioned)

Facility: OH CH KH PH WHH Unit:

Distribution:

Nursing Shared Governance Entity Councils Date:

Brief description of case: (include issues identified with nursing standard of care/practice & documentation)

Issues Identified:

| Check Actions | Unit Action Plan |
|---------------|------------------------------------------------------------------------------------------|
| | No action warranted |
| | Employee self-acknowledged, action plan sufficient |
| | Educational error to employee sufficient |
| | Employee to develop unit staff education (i.e. in-service, story board, etc.) |
| | Specify: |
| | Discussion of informal improvement plan with employee |
| | Formal employee improvement plan with monitoring |
| | Referral to nurse manager for employee follow-up |
| | Referral to nursing leadership for follow-up of issues outside of unit scope of practice |
| | Staff Communication Plan (i.e. Nurses Staff Meetings, Education, etc.) |
| Required | Specify: |
| | Formal staff improvement plan with monitoring (if appropriate) |
| | Specify: |
| | Other: |

Additional Comments or Lessons Learned that you wish to share with other units:

For more information/sharing of action plan items, Please Contact:

CONFIDENTIAL: Peer Review Protected Pursuant to GA Law

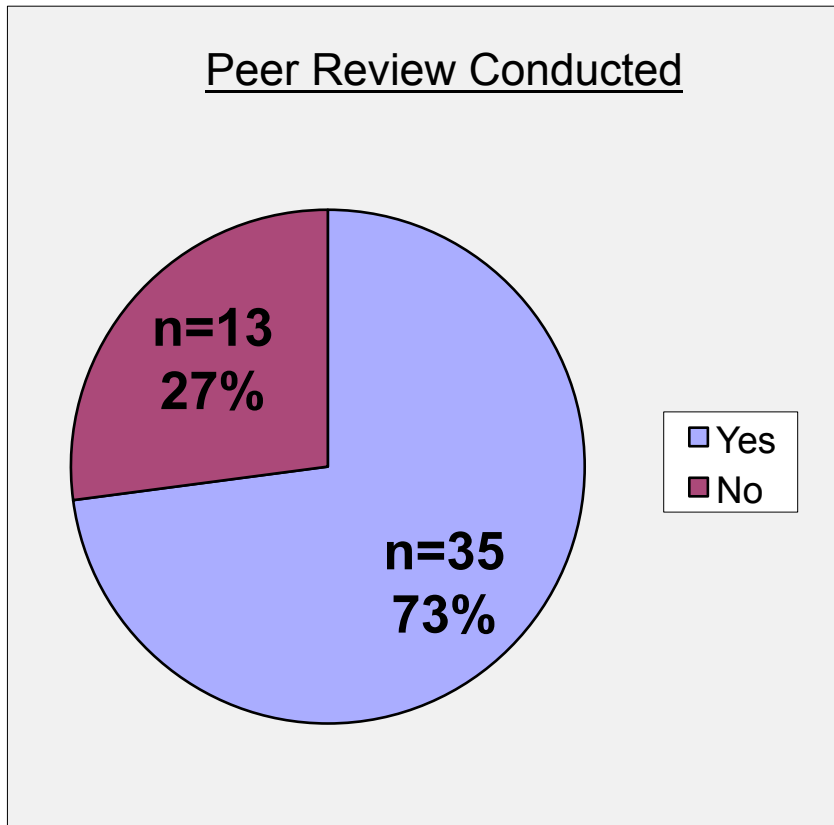

- Lessons Learned are shared by committee in shared governance meetings at unit, facility and system levels
- Case summary of de-identified findings & “lessons learned”

What have we found?

FINDINGS

Referrals

- 35 of 48 total referred cases were formally team reviewed
 - Jan. 2010 to Aug. 2012
- Reasons the cases were not reviewed
 - Management and/or Disciplinary issues

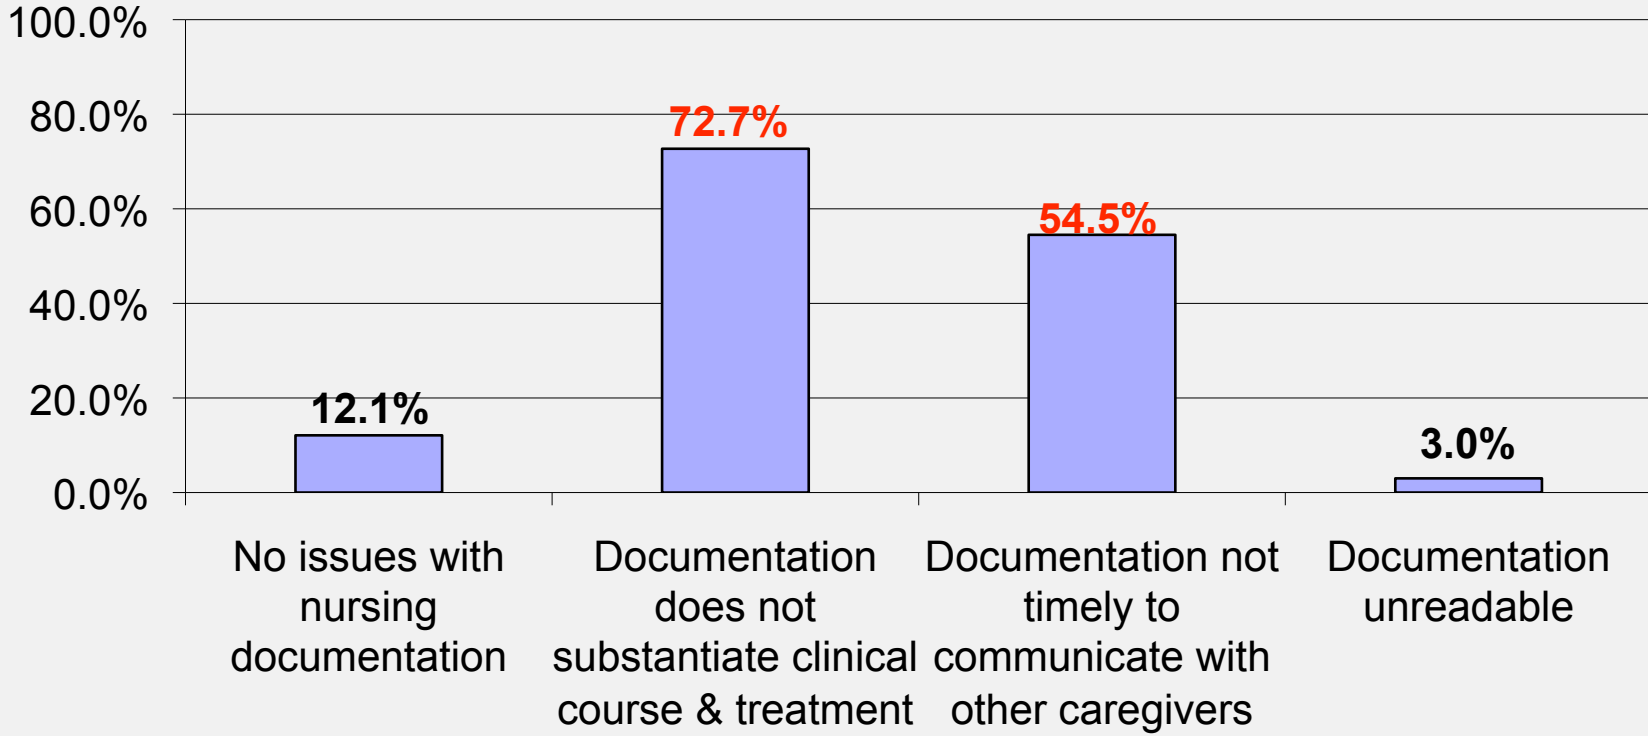

Referral Sources

Standard of Care/Practice Issues Identified

Documentation Issues

Nursing Practice Changes

- Hand-off communication
 - Several projects have been completed
- Process for direct ICU admissions via ED
- Direct physician contact for rapid declining patients
- Dilaudid dosing decreased and warning messages added to pyxis and eMAR
- Blanket warmer for acute care units
- Obstetrical/Neonatal Emergencies
 - Neonatal equipment for ED
 - Simulation/Critical event training with participation from EMS, ED, L&D and NICU
 - Development of an OB/Neonatal response team

Impact of Nursing Peer Review

- NPR model promotes both empowerment as well as ownership/accountability for their nursing practice
 - Gives nurses an avenue where it is possible to step up and address issues to improve nursing practice and patient outcomes
 - Help nurses initiate changes in nursing policy directly related to the outcomes from case reviews
 - Promotes a positive outlook with processes and outcomes
- Creates an environment/culture where the Status Quo is unacceptable and questioned

Future of Nursing Peer Review

- Increase number of Case Reviews completed each year
- Further expand staff nurse committee involvement in ownership of conducting reviews and following through on action items
- Continue to look for more practice improvement recommendations from case reviews
- Wider audience presentations- unit level meetings, off-shift staff, multi-disciplinary forums
